<description>JSecurity JSP Tag Library. Authors: Les Hazlewood, Jeremy Haile</description>

<tag>

<name>hasPermission</name>

<tag-class>org.jsecurity.web.tags.HasPermissionTag</tag-class>

<body-content>JSP</body-content>

<description>Displays body content only if the current Subject (user)

'has' (implies) the specified permission (i.e the user has the specified ability).

</description>

<attribute>

<name>name</name>

<required>>true</required>

<rtexprvalue>>true</rtexprvalue>

</attribute>

</tag>

<tag>

<name>lacksPermission</name>

```
<tag-class>org.jsecurity.web.tags.LacksPermissionTag</tag-class>
```

```
<body-content>JSP</body-content>
```

```
<description>Displays body content only if the current Subject (user) does
```

```
NOT have (not imply) the specified permission (i.e. the user lacks the specified ability)
```

```
</description>
```

```
<attribute>
```

```
<name>name</name>
```

```

```

<tag>

<name>hasAnyRoles</name>

<tag-class>org.jsecurity.web.tags.HasAnyRolesTag</tag-class>

<body-content>JSP</body-content>

<description>Displays body content only if the current user has one of the specified roles from a comma-separated list of role names.

</description>

<attribute>

<name>name</name>

<required>>true</required>

<rtexprvalue>>true</rtexprvalue>

</attribute>

</tag>

<tag>

<name>lacksRole</name>

<tag-class>org.jsecurity.web.tags.LacksRoleTag</tag-class>

<body-content>JSP</body-content>

<description>Displays body content only if the current user does NOT have the specified role (i.e. they explicitly lack the specified role)

</description>

<attribute>

<name>name</name>

<required>>true</required>

<rtexprvalue>>true</rtexprvalue>

</attribute>

</tag>

<tag>

<name>authenticated</name>

<tag-class>org.jsecurity.web.tags.AuthenticatedTag</tag-class>

<body-content>JSP</body-content>

<description>Displays body content only if the current user has successfully authenticated
during their current session. It is more restrictive than the 'user' tag.

It is logically opposite to the 'notAuthenticated' tag.

</description>

</tag>

<tag>

<name>notAuthenticated</name>

<tag-class>org.jsecurity.web.tags.NotAuthenticatedTag</tag-class>

<body-content>JSP</body-content>

<description>Displays body content only if the current user has NOT successfully authenticated
during their current session. It is logically opposite to the 'authenticated' tag.

</description>

</tag>

<tag>

<name>user</name>

<tag-class>org.jsecurity.web.tags.UserTag</tag-class>

<body-content>JSP</body-content>

<description>Displays body content only if the current Subject has a known identity, either from a previous login or from 'RememberMe' services. Note that this is semantically different from the 'authenticated' tag, which is more restrictive. It is logically opposite to the 'guest' tag.

</description>

</tag>

<tag>

<name>guest</name>

<tag-class>org.jsecurity.web.tags.GuestTag</tag-class>

<body-content>JSP</body-content>

<description>Displays body content only if the current Subject IS NOT known to the system, either because they have not logged in or they have no corresponding 'RememberMe' identity. It is logically opposite to the 'user' tag.

</description>

</tag>

<tag>

<name>principal</name>

<tag-class>org.jsecurity.web.tags.PrincipalTag</tag-class>

<body-content>JSP</body-content>

<description>Displays the user's principal or a property of the user's principal.</description>

<attribute>

<name>type</name>

<required>false</required>

<rtexprvalue>true</rtexprvalue>

</attribute>

<attribute>

<name>property</name>

<required>false</required>

<rtexprvalue>true</rtexprvalue>

</attribute>

<attribute>

<name>defaultValue</name>

<required>false</required>

<rtexprvalue>true</rtexprvalue>

</attribute>

</tag>

</taglib>
